## EXECUTIVE Summary

---

The City of McComb commissioned Eco-Systems to conduct a Phase I Environmental Site Assessment (Phase I ESA) in downtown McComb, Mississippi. The review area for this report is one of several areas currently under evaluation and consists of a multi-parceled commercial property located north of Canal Street, east of Front Street, and west of Railroad Boulevard in downtown McComb, Mississippi. This area is specifically identified as the McComb Electric site. This work was part of the Brownfields Assessment Program. The Brownfield's Program is being utilized to evaluate a number of areas within the City of McComb in order to revitalize abandoned or under-utilized areas. The project activities are being conducted as part of the city's ongoing efforts to improve the areas within the business district as part of a Brownfields Assessment Grant funded through and implemented under the direction of the U.S. Environmental Protection Agency (EPA)

Eco-Systems completed the Phase I ESA of the review area in accordance with the scope and limitations of ASTM Standard E1527-05. Through the process of completing the Phase I ESA, Areas of potential Environmental Concern (AECs) and more specifically, Historical Recognized Environmental Conditions (HRECs), were identified. The following findings and recommendations are based upon conditions observed at the time of reconnaissance, a "good faith" reliance on the information gathered from interviews and records, the information available for review within the time frame allowed by this project, and the limitations of the procedures and methodologies utilized:

**AEC-1/Historical-REC-1: Onsite Historic Filling Station.** A review of the 1949 and 1961 Environmental Data Resource (EDR) Sanborn Maps revealed that a former Filling Station and Tire Vulcanizing facility were historically located on the subject site. No additional information regarding closure of the USTs could be obtained from the MDEQ or commercial environmental records reports. Although interviews indicated the former filling station's USTs may still be in the ground and several cut off pipes were observed onsite, Eco-Systems could not verify their presence with other standard lines of evidence.

*Recommendation: Based on the location of the on-site historical automobile filling station and information obtained during the interview process, Eco-Systems recommends a targeted Phase II soil, soil gas, and groundwater investigation be completed on the subject site to evaluate the presence and magnitude of subsurface impact. Although no substantive evidence was revealed to accurately determine if the potential USTs exist on-site, Eco-Systems recommends that any historic USTs on the subject site be identified, evaluated, and removed from the ground using either non-invasive geophysical methods and/or excavation.*

**AEC-2/HREC-2: Offsite Undifferentiated Historic Filling Stations/Auto Repair Shops.** A review of the 1918, 1925, 1949, and 1961 Environmental Data Resource (EDR) Sanborn Maps revealed that numerous historic filling stations and auto repair shops with several gasoline tanks were located in close proximity to the subject site. Two historic

automobile repair facilities were identified 50 feet south and southwest of the subject site. Historic filling stations and automobile repair facilities are known to have commonly released petroleum. These releases are a result of spills and leaks that occur over the years during the handling and storage of petroleum constituents and degreasing solvents. Although, unsubstantiated by other lines of evidence, these sites are of concern due to the close proximity to the subject site location.

*Recommendation: Based on the number and location of several historical automobile filling stations and repair shops, Eco-Systems recommends a targeted Phase II soil, soil gas, and groundwater investigation be completed on the subject site.*

**AEC-3/HREC-3: Offsite Historic Dry Cleaners.** A review of the 1925, 1949, and 1961 EDR Sanborn Maps revealed that at least two (2) historic dry cleaning facilities were located less than 750 feet west of the subject site. Further, a review of the 1918 & 1913 EDR Sanborn Maps revealed that a historic Chinese laundry facility was located approximately 150 feet north of the subject site on North Front Street. Historical dry cleaners are known to have commonly released chlorinated or Stoddard solvents. Although, unsubstantiated by other lines of evidence, these sites are of concern due to the close proximity to the subject site location.

*Recommendation: Although historical dry cleaners are known to have commonly released hazardous solvents, no lines of evidence were found indicating the listed laundry as ever being a dry cleaner or using or releasing any hazardous substances. Eco-Systems does not recommend any further assessment associated with this AEC.*

**AEC-4/HREC-4: Offsite Metal Slag, Railyard & Museum Site.** Eco-Systems reviewed assessment and remediation files at the Mississippi Department of Environmental Quality (MDEQ). The files revealed heavy metals such as Lead and Arsenic were identified in the underlying soils of the nearby properties. An interview with MDEQ's project manager revealed that analysis of groundwater samples extracted from onsite Monitoring Well MW-15 reported elevated levels of Lead. The MDEQ said MW-15 was installed to monitor potential migration of groundwater impacts from offsite sources.

*Recommendation: Based on the distance and hydraulic position from the subject site and nature and extent of the contaminants of concern, Eco-Systems believes this known impact will not adversely impact the review area. Therefore, no additional investigation is warranted or recommended in association with this AEC.*

**AEC-5/HREC-5: Offsite IGCC Railroad & Undifferentiated Areas of Concern.** During the review of the Environmental Data Resources (EDR) Report, Illinois Central Gulf Railroad (ICGR) was identified in the Comprehensive Environmental Response, Compensation, and Liability Information System-No Further Remedial Action Planned CERCLIS-NFRAP database. CERCLIS-NFRAP sites are those that have had previous site assessments and that the U.S. Environmental Protection Agency (EPA) has

determined no further steps will be taken to list the site under the National Priorities List (NPL) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. In addition, ICGR was identified as a SHWS site with soils contaminated with Total Petroleum Hydrocarbons (TPH). The site was observed to be in close proximity to the subject site. The site is active and currently being remediated. Eco-Systems reviewed the site files at the Mississippi Department of Environmental Quality (MDEQ). Significant levels of soil and groundwater impact were identified across multiple areas of concern in the ICGR; these areas include the Locomotive Fueling Area, Railroad Car Repair Area, Former AST/UST locations, and Automotive Shop

*Recommendation: Eco-Systems believes that the MDEQ's close involvement in this potential offsite source of soil and groundwater impact limits the need to complete additional groundwater assessment on the subject site. Therefore, no additional investigation is warranted or recommended in association with this AEC.*

**AEC-6: Offsite Undifferentiated Leaking Underground Storage Tanks (LUST) Sites.** During the review of the EDR Report, numerous LUST sites were identified within the required search radius of the subject site. Of the six LUST sites identified, only one was identified as **active** and reported with soil and groundwater contamination. This site is identified as the DST Foodmart facility, located approximately 2,050 feet south and down-gradient of the subject site. The remaining five LUST sites were indicated by the EDR Report to have received No Further Action letters.

*Recommendation: Considering the distance to the subject site and its hydraulic position, Eco-Systems does not recommend any further action associated with this AEC.*

**AEC-7: Potential Asbestos Containing Materials (ACMs).** During the site reconnaissance, wall material from an on-site structure constructed with ACM was observed in poor overall condition. Focused samples of portions of the wall material revealed 25% potentially-friable Chrysotile. As such and considering the age and condition of the building, Eco-Systems believes the exterior wall material and additional building materials such as any pipe insulation are likely ACMs. The overall condition of the structure was observed dilapidated, including extensive roof damage, and therefore could become potentially-friable if disturbed.

*Recommendation: Eco-Systems recommends an asbestos survey be conducted by a certified asbestos professional prior to any remodeling or demolition activities conducted on the subject site.*

**AEC-8: Potential Lead-Based Paint (LBP).** During the site reconnaissance, Eco-Systems collected a sample of wall material and submitted it to a laboratory for analysis to screen for the presence of lead-based paint (LBP) materials. The sample could not be analyzed because it tested positive for ACM. As such and considering the age and

condition of the building, Eco-Systems believes additional building materials likely contain lead-based paint coverings.

*Recommendation: Eco-Systems recommends a lead-based paint survey be conducted by an EPA-certified professional prior to any remodeling or demolition activities conducted on the subject site.*

It is important to note **that designation as an AEC does not necessarily equate to a REC**. The designation of an AEC provides unified terminology for the discussion of potential on-site or off-site issues during the investigative process.

## **1.0 Introduction**

---

The City of McComb commissioned Eco-Systems to conduct a Phase I Environmental Site Assessment (Phase I ESA) of a multi-parceled commercial property located north of Canal Street, east of Front Street, and west of Railroad Boulevard in McComb, Pike County, Mississippi. The Phase I ESA was conducted in accordance with the ASTM *Standard E 1527-05, Standard Practice for Environmental Site Assessments, Phase I Environmental Site Assessment Process*. The review area consists of a commercial building identified as McComb Electric. A review area location map depicting portions of the United States Geological Survey (USGS) 7.5-Minute Series, *McComb, Mississippi* quadrangle is provided as **Figure 1**.

### **1.1 Purpose**

The purpose of the *Phase I ESA* portion of the ESA scope of work was to identify potential or identified Recognized Environmental Conditions (RECs) associated with the subject property. RECs, as defined by American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-05), means the presence or likely presence of any hazardous substances (contaminants regulated by the Comprehensive Environmental Response, Compensation, and Liability Act, or CERCLA) or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

### **1.2 Detailed Scope-of-Services**

This *Phase I ESA* conforms to ASTM E 1527-05. In general, the *Phase I ESA* included four components:

- Records review,
- Review area reconnaissance,
- Interviews with key personnel, and
- Preparation of a report with the findings of the Phase I ESA.

To fulfill the ASTM requirements, a commercially-available report was obtained to review federal and state environmental databases for environmental concerns associated with the review area and nearby properties that could potentially impact the review area. A walking visual reconnaissance was conducted of the subject site on June 20, 2013 to observe general conditions and evidence of possible environmental impacts, and to document review area features and conditions. Photographs from the field reconnaissance are available in **Appendix A**. Interviews

were conducted with key personnel with knowledge of past activities conducted within and near the subject site. The work also included review of other readily-obtainable records including topographic maps and historical aerial photographs.

### **1.3 Significant Assumptions**

Eco-Systems has relied on information provided by others in assessing the subject site. Such information included site documents provided by client (see Section 3.0), historical and environmental database information provided by Environmental Data Resources (EDR) of Milford, Connecticut (Section 4.0), and Mississippi Department of Environment Quality (MDEQ) database information. In most cases, the provided information could not be independently verified.

### **1.4 Limitations and Exceptions**

This *Phase I ESA* conforms to the ASTM Standard Practice for environmental site assessments (ASTM-E 1527-05). Even so, no *Phase I* can completely eliminate uncertainty about a property's potential for environmental problems. No statement of certainty can be made regarding subsurface conditions from any onsite or offsite sources of contamination. Eco-Systems relied on information provided by others in assessing the site and in some cases the information has not been independently verified. This report is a prudent and reasonable evaluation of the subject property's observed environmental condition.

Eco-Systems assumes no responsibility for conditions or information not practically reviewable, nor does it guarantee the accuracy or completeness of information obtained from other parties. This report should not be construed as verifying the present property owner or operator's compliance with federal, state, and local regulations, or as a recommendation to purchase, sell, or develop the subject property. The assessment is not intended to include *de minimis* conditions that generally do not put the public health or the environment at risk and generally would not be the subject of an enforcement action if brought to the attention of a government agency.

Please note, this assessment did not include sampling of surface water, radon, mold, or general indoor air quality; wetlands, ecological, or endangered species studies; or evaluation of high-voltage power lines and associated equipment. This assessment did include screening level sampling of potential asbestos containing materials (ACMs) and potential lead-based paint (LBP) materials (See Section 7.0).

#### **ASBESTOS CONTAINING MATERIALS (ACMs)**

ACM has conditional designations of being friable or non-friable. Friable materials are those materials that when dry, can be crumbled, pulverized or reduced to a powder by hand-pressure. The friable designation does not necessarily indicate the need for abatement, but refers only to its physical composition. Friable ACM are building materials that are considered a potential environmental concern. Non-friable ACMs (such as floor tile/mastic) in good condition are

generally not considered an imminent environmental concern to the subject site or occupants, due to the fact that the material is unlikely to become airborne.

**LEAD-BASED PAINT (LBP) MATERIALS**

Lead paint was historically used on metal components such as metal window frames, door frames, and metal baseboards in older buildings. Lead paint concerns are typically related to friable, flaking, or deteriorated paint on metal surfaces.

**1.5 *Special Terms and Conditions***

No special terms or conditions were specified for this Phase I ESA.

**1.6 *User Reliance***

Eco-Systems was retained by The City of McComb to perform a *Phase I ESA* at the subject property. This assessment was prepared for the exclusive use of The City of McComb in evaluating the current condition of the subject property prior to potential transfer of facility operations and assets. Any other party's reliance on this report is at his/her own risk, unless specifically granted authorization in writing by Eco-Systems.

**1.7 *EPA "All Appropriate Inquiry" Statutory Criteria Compliance***

This assessment is intended to permit the *user* to satisfy one of the requirements to qualify for the *innocent landowner defense* to CERCLA liability and to complete "all appropriate inquiry" (AAI) into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 United States Code Section 9601(35)(B).

## **2.0 Review area Description**

---

### ***2.1 Location and Legal Description***

The subject site consists of a historically developed multi-parceled commercial property located north of Canal Street, east of Front Street, and west of Railroad Boulevard in downtown McComb, Pike County, Mississippi. The site is centrally specifically located at latitude 31.242879° North, longitude -90.451529° West (**Figure 1**). A legal description for the site was provided by the user and found in **Appendix B**. The approximate review area boundaries are illustrated on **Figure 2**.

### ***2.2 Review Area and Vicinity General Characteristics***

The review area consists of a multi-parceled commercial property located in downtown McComb, Pike County, Mississippi. (**Photo 1**) found in **Appendix A**. The subject site is located north of Canal Street, east of South Front Street, and west of Railroad Boulevard. The subject site has an elevation of approximately 405 feet above mean sea level (msl). The review area is located within the downtown area of McComb. The area surrounding the subject site is primarily used for commercial purposes. The vicinity of the review area contains moderate slopes and characteristic of the surrounding areas. Stormwater generally flows southeastward.

### ***2.3 Current Use of the Property***

The subject site contains a dilapidated building with a covered garage area currently being used for storage purposes.

### ***2.4 Descriptions of Structures, Roads, Other Improvements***

The site contains a dilapidated structure constructed of possible ACMs. The structure has covered garage area and concrete foundation. Entrance to the building is gained through a double-wooden door facing south towards Canal Street. The remainder of the site has poured concrete slabs with no additional structures. The property is bounded by South Front Street, Canal Street, South Railroad Boulevard, and a commercial property.

### ***2.5 Current Uses of the Adjoining Properties***

McComb Electric Supply Company is located north of the subject site. Railroad Boulevard adjoins the subject site to the east. South Front Street adjoins the subject site to the west. Canal Street adjoins the subject site to the south.

## **3.0 User Provided Information**

---

### ***3.1 Title Records***

A chain of title was not provided by the user. However, a copy of the current warranty deed (Instrument #137479) dated March 6, 2001, for portions of the property was provided by the user and is found in **Appendix B**.

### ***3.2 Environmental Liens or Activity and Use Limitations***

No indication of any environmental liens or activity and use limitations were observed while reviewing the current warranty deeds.

### ***3.3 Specialized Knowledge***

The user provided information regarding USTs potentially located on the subject site. Detailed information is further discussed in Section 6.0.

### ***3.4 Commonly Known or Reasonably Ascertainable Information***

No commonly known or reasonably-ascertainable information was specified by the user for this Phase I ESA.

### ***3.5 Valuation Reduction for Environmental Issues***

A valuation reduction due to existing or potentially-existing environmental issues related to the subject site was not indicated by the user.

### ***3.6 Owner, Property Manager, and Occupant Information***

Portions of the property are owned and operated by Richard Moore and Rose Marie Vaccarella.

### ***3.7 Reason for Performing Phase I ESA***

The review area is part of an area of properties that are being targeted for redevelopment under the U.S. Environmental Protection Agency's Brownfields Assessment Program and funded through the City of McComb Brownfields Assessment Grant.

### ***3.8 Previous Environmental Reports***

No previous environmental reports were obtained during this Phase I ESA.

## 4.0 Records Review

To expedite the records review process, Eco-Systems contracted Environmental Data Resources, Inc. (EDR), a national environmental data records research and reporting service, to conduct a search of applicable state and federal regulatory databases.

### 4.1 Standard Environmental Record Sources

The results of this search are included in **Appendix C**. The EDR report included a search of the following federal databases:

<u>Database</u>	<u>Description</u>	<u>Search Radius (Miles)</u>
NPL	National Priority List	1
Proposed NPL	Proposed NPL Sites	1
CERCLIS	Comprehensive Environmental Response, Compensation, and Liability Information System	½
CERCLIS-NFRAP	No Further Remedial Action Planned	½
CORRACTS	Corrective Action Report	1
RCRA	Resource Conservation and Recovery Information System	1
TSDf	Treatment, Storage, and/or Disposal	½
LQG	Large Quantity Generator	¼
SQG	Small Quantity Generator	¼
ERNS	Emergency Response Notification System	Review area

Supplemental federal databases included in the EDR report include the following:

<u>Database</u>	<u>Description</u>	<u>Search Radius (Miles)</u>
CONSENT	CERCLA Consent Decrees	1
ROD	NPL Records of Decision	1
Delisted NPL	NPL Deletions	1
FINDS	Facility Index System/Facility Identification Initiative Program Summary Report	Review area
HMIRS	Hazardous Materials Information Reporting System	Review area
MLTS	Material Licensing Tracking System	Review area
MINES	Mines Master Index File	¼
NPL Liens	Cost Recovery Liens against CERCLA Sites	Review area
PADS	PCB Activity Database System	Review area
FUDS	Formerly Used Defense Sites	1

<u>Database</u>	<u>Description</u>	<u>Search Radius (Miles)</u>
UMTRA	Uranium Mill Tailings Sites	1/2
ODI	Open Dump Inventory	1/2
INDIAN RESERV	Indian Reservations	1
DOD	Department of Defense Sites	1
RAATS	RCRA Administrative Action Tracking System	Review area
TRIS	Toxic Chemical Release Inventory System	Review area
TSCA	Toxic Substances Control Act	Review area
SSTS	FIFRA Section 7 Tracking System	Review area
FTTS	Tracks enforcement action related to FIFRA, TSCA, and EPCRA	Review area

The State of Mississippi databases required by ASTM 1527-05 reviewed by EDR are as follows:

<u>Database</u>	<u>Description</u>	<u>Search Radius (Miles)</u>
State Haz. Waste (MS & LA)	CERCLA/Uncontrolled Sites	1
State Landfill (MS & LA)	Solid Waste Landfills	1/2
LUST	Leaking Underground Storage Tank Database	1/2
UST	Underground Storage Tanks	1/4
Indian UST	USTs on Indian Land	1/4
Indian LUST	LUSTs on Indian Land	1/2
SWRCY	Voluntary Evaluation Program Sites	1/2
VCP	Voluntary Evaluation Program Sites	1/2

The State of Mississippi databases not required by ASTM 1527-05 reviewed by EDR are as follows:

<u>Database</u>	<u>Description</u>	<u>Search Radius (Miles)</u>
NPDES	Water Discharge Permit Data	Review area
AST	Above Ground Storage Tanks regulated by the Department of Commerce	Review area
ENG CONTROLS	Sites with Engineering Controls	1/2

Brownfields Databases:

<u>Database</u>	<u>Description</u>	<u>Search Radius (Miles)</u>
US	Listing of Brownfields Sites	1/2
BROWNFIELDS INST CONTROL	Sites with institutional controls	1/2

<u>Database</u>	<u>Description</u>	<u>Search Radius (Miles)</u>
BROWNFIELDS	Uncontrolled Sites List	1/2
VCP	Voluntary Evaluation Program Sites	1/2

#### **4.1.1 National Priorities List (NPL)**

The NPL is the U.S. Environmental Protection Agency (USEPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. A site must surpass a predetermined hazard ranking system score, be chosen as a state’s top priority site, or meet three (3) specific criteria set jointly by the US Department of Health and Human Services and the USEPA in order to become an NPL site. The EDR report **did not** indicate any NPL sites within the one-mile search radius.

#### **4.1.2 Proposed NPL Sites**

The Proposed NPL Sites are those sites that have been recommended for entry into the NPL but the decision to include sites on the NPL is pending. The EDR report **did not** indicate any Proposed NPL sites within a one-mile radius of the review area.

#### **4.1.3 Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)**

The CERCLIS list contains sites that are either proposed to or appear on the National Priorities List (NPL). The EDR report **did not** indicate any CERCLIS sites within a one-half mile radius of the review area.

#### **4.1.4 Comprehensive Environmental Response, Compensation and Liability Information System – No Further Remedial Action Planned (CERCLIS-NFRAP)**

CERCLIS sites designated “No Further Remedial Action Planned” (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. USEPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to redevelopment of these properties and has archived them as historical records so USEPA does not needlessly repeat the investigations in the future. This policy change is part of the USEPA’s Brownfields Redevelopment Program to help cities, states, private investors, and affected citizens to promote economic redevelopment of unproductive urban sites. The EDR report **identified** the presence of one CERCLIS-NFRAP site listed within a one-half mile radius of the review area.

*Sites at lower elevation than the review area:*

1. Illinois Central Gulf Railroad is located at South Railroad Boulevard, approximately 0.10 miles (400 feet) northeast of the subject site.

#### **4.1.5 Corrective Action Report (CORRACTS)**

CORRACTS is a USEPA database of Resource Conservation and Recovery Act (RCRA) facilities that are undergoing “corrective action”. A “corrective action order” is issued pursuant to RCRA Section 3008 (h) when there has been a release of hazardous waste into the environment from a RCRA facility. The EDR report **did not** indicate the presence of any CORRACTS sites listed within a one-mile radius of the review area.

#### **4.1.6 Resource Conservation and Recovery Act (RCRA)**

The RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities databases are a compilation by the USEPA of facilities that report storage, transportation, treatment or disposal (TSD) of hazardous waste or generators of hazardous waste. Hazardous waste generators are further divided into Large Quantity Generators (LQG), Small Quantity Generators (SQG), and Conditionally Exempt Small Quantity Generators (CESQG). LQGs are facilities that generate more than 1000 kg/month of non-acutely hazardous waste or more than 1 kg/month of acutely hazardous waste. SQGs generate less than the 1000 kg/month of non-acutely hazardous waste or less than 1 kg/month of acutely hazardous waste. The EDR report **identified** the presence of four RCRA-CESQG sites listed within a one-quarter mile radius of the review area:

*Sites at an equal or higher elevation than the review area:*

1. L&M Downtown, 126 North Broadway Street, located approximately 0.19 miles northwest of the subject site.
  - L&M Downtown is listed in the RCRA-CESQG database for ignitable hazardous wastes, Sodium Hydroxide, and Arsenic with no violations present.
2. Jammies Auto Repair, 126 North Broadway Street, located approximately 0.19 miles northwest of the subject site.
  - Jammies Auto Repair is listed in the RCRA-CESQG database for handling ignitable hazardous wastes with no violations present.
3. Day Pontiac, 324 South Broadway Street, located approximately 0.18 miles southwest of the subject site.
  - Day Pontiac is listed in the RCRA-CESQG database for handling ignitable hazardous wastes with no violations present.

*Sites at a lower elevation than the review area:*

4. Webre’s Auto Repair, 224 South Broadway Street, located approximately 0.10 miles south-southwest of the subject site.
  - Webre’s Auto Repair is listed in the RCRA-CESQG database for handling ignitable hazardous wastes with no violations present.

A review of the RCRA-NonGen list **identified** the presence of five RCRA-NonGen locations within a one-quarter-mile radius of the subject site:

*Sites at an equal or higher elevation than the review area:*

1. Goodyear Auto Service Center, 126 North Broadway, located approximately 0.19 miles west of the subject site.
  - Goodyear Auto Service Center is listed in the RCRA-NonGen database for handling ignitable hazardous wastes and numerous spent halogenated solvents with no violations present.
2. CARQUEST Auto Parts, 200-215 5<sup>th</sup> Avenue, located approximately 0.14 miles south-southwest of the subject site.
  - CARQUEST Auto Parts is listed in the RCRA-NonGen database for handling lead with no violations present.
3. Trademark Motors, 301 South Broadway Street, located approximately 0.14 miles south-southwest of the subject site.
  - Trademark Motors is listed in the RCRA-NonGen database for handling ignitable hazardous wastes and numerous spent halogenated solvents with no violations present.

*Sites at a lower elevation than the review area:*

4. Culotta Tire and Auto Center, 222 South Broadway Street, located approximately 0.10 miles west of the subject site.
  - Culotta Tire and Auto Center is listed in the RCRA-NonGen database for handling ignitable hazardous wastes, Sodium Hydroxide, and numerous spent halogenated solvents with no violations present.
5. Dallas Jackson, Inc., 215 3<sup>rd</sup> Street, located approximately 0.18 miles west-southwest of the subject site.
  - Dallas Jackson, Inc. is listed in the RCRA-NonGen database for numerous spent halogenated solvents with no violations present.

#### **4.1.7 Emergency Response Notification System (ERNS)**

ERNS is a national database used to collect information on reported releases of oil and hazardous substances. The database contains information from spill reports made to the federal authorities including the USEPA, the US Coast Guard, the National Response Center and the Department of Transportation. The EDR report **did not** identify any spill reports related to the review area.

#### **4.1.8 State Hazardous Waste Sites (SHWS)**

The state hazardous waste site inventory includes sites that are included in the Mississippi Uncontrolled Sites List which is the state equivalent of CERCLIS. The EDR report **identified** the presence of one SHWS site located within the one-mile search radius.

*Sites at lower elevation than the review area:*

1. Illinois Central Gulf Railroad-MC is located approximately 0.30 miles south-southeast of the subject site.
  - Illinois Central Gulf Railroad-MC is listed as a SHWS listed as **active** and reported with soil and groundwater contamination. The major contaminants are listed as Lead, Arsenic, and Total Petroleum Hydrocarbons (TPH) with a high concentration of 32,200 mg/Kg. The site was issued a federal no further action on February 25, 1998.

#### **4.1.9 Solid Waste Landfill (SWF/LF)**

The SWF/LF is a database of solid waste disposal sites. The EDR report **did not** identify any SWF/LF sites within a one-half-mile radius of the review area.

#### **4.1.10 Leaking Underground Storage Tanks (LUST)**

The leaking underground storage tank (LUST) database contains an inventory of reported LUST incidents. The EDR report **identified** the presence of six LUST sites within a one-half-mile radius of the review area:

*Sites at an equal or higher elevation than the review area:*

1. Ray Deer Texaco is located at 131 South Broadway Street, approximately 0.10 miles west-southwest of the subject site.
  - Ray Deer Texaco is listed as **inactive**. The LUST status is listed as closed with a no further action date of May 8, 2000.
2. McComb Police Division is located at 100 5<sup>th</sup> Street, approximately 0.07 miles south of the subject site.
  - McComb Police Division is listed as **inactive**. The LUST status is listed as closed with a no further action date of October 11, 1989.
3. Holmes North Broadway Shell is located at 500 North Broadway, approximately 0.48 miles north-northwest of the subject site.
  - Holmes North Broadway Shell is listed as **inactive**. The LUST status is listed as open.

*Sites at lower elevation than the review area:*

4. Brumfield Oil Company is located at 500 Pearl River Avenue, approximately 0.27 miles northeast of the subject site.
  - Brumfield Oil Company is listed as **inactive**. The LUST status is listed as closed with a no further action date of December 11, 1992.
5. McComb Public Works Department is located at 122 East Michigan Street, approximately 0.36 miles north of the subject site.
  - McComb Public Works Department is listed as **inactive**. The LUST status is listed as open.
6. DST Foodmart is located at 601 South Broadway, approximately 0.41 miles south of the subject site.

- DST Foodmart is listed as **active**. The LUST status is listed as open.

#### 4.1.11 Underground Storage Tanks (UST)

The underground storage tank (UST) database contains an inventory of registered USTs. The EDR report **identified** the presence of 6 UST sites within the one-quarter-mile radius of the review area:

*Sites at an equal or higher elevation than the review area:*

1. Ray Deer Texaco is located at 131 South Broadway Street, approximately 0.10 miles west-southwest of the subject site.
  - Ray Deer Texaco is listed as inactive with 4 permanently out of use tanks.
2. Alexander's Gulf is located at 201 North Broadway, approximately 0.25 miles northwest of the subject site.
  - Alexander's Gulf is listed with 3 active currently in use gasoline tanks with Epoxy coated steel and cathodically protected secondary containment and 5 permanently out of use tanks.
3. McComb Police Division is located at 100 5<sup>th</sup> Street, approximately 0.07 miles south of the subject site.
  - McComb Police Division is listed as inactive with 1 permanently out of use tank.

*Sites at lower elevation than the review area:*

4. Illinois Central Gulf Railroad is located at South Railroad Boulevard, approximately 0.06 miles north-northeast of the subject site.
  - Illinois Central Gulf Railroad is listed as inactive with 4 permanently out of use tanks.
5. Warehouse is located at 200 North Railroad Boulevard, approximately 0.18 miles north of the subject site.
  - Warehouse is listed as inactive with 1 permanently out of use tank.
6. Conner Abandoned Station is located at 202 South Broadway, approximately 0.14 miles west-southwest of the subject site.
  - Conner Abandoned Station Railroad is listed as inactive with 3 permanently out of use tanks.

#### 4.1.12 Above Ground Storage Tanks (ASTs)

The above storage tank (AST) database contains an inventory of registered ASTs. The EDR Report **did not** identify the presence of AST sites within the ¼-mile radius of the review area.

#### 4.1.13 Indian Lands

The EDR report **did not** indicate any environmental records associated with Indian land within the search radius of the review area.

#### **4.1.14 SWRCY Mississippi Recycling Directory**

The EDR report **identified** one State listed recycling facilities located within one-half mile of the review area.

*Sites at an equal or higher elevation than the review area:*

1. Andrews Metal Inc. is located at 304 Summit Street, approximately 0.5 miles north of the subject site.
  - Andrews Metal Inc. recycles aluminum cans, steel cans, brass, bronze, stainless steel, copper, and lead.

#### **4.1.15 Facility Index System/Facility Identification Initiative Program Summary Report**

FINDS contains both facility information and “pointers” to other sources that contain more detail. The EDR report includes the following FINDS databases: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and tract information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control) C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System). The EDR report **did not** identify any FINDS issues within the review area.

#### **4.1.16 High Risk Historical Automobile Stations**

The EDR US Historical Automobile Station database is a collection of potential historical gas stations, filling stations, and service station sites. This database falls within a category of information EDR classifies as “High Risk Historical Records” or HRHR. The EDR report **identified** the following four HRHR Automobile sites within issues within a one-quarter mile radius of the review area.

1. 130 Main Street, located approximately 0.09 miles north of the subject site, is listed as a historical Morgan Small Engine Repair facility.
2. 224 Canal Street, located approximately 0.09 miles west of the subject site, is listed as a historical Texaco Professional Car Wash facility.
3. 400 South Broadway, located approximately 0.19 miles southwest of the subject site, is listed as a Southwest Auto Sales facility.
4. 410 South Railroad Boulevard, located approximately 0.22 miles south of the subject site, is listed as a Moaks Transmission and Air Conditioning facility.

#### **4.1.17 High Risk Historical Cleaners**

The EDR US Historical Cleaners database is a collection of potential historical dry cleaner sites. This database falls within a category of information EDR classifies as “High Risk Historical Records” or HRHR. The EDR report **did not** identify any HRHR Dry Cleaner sites within a one-quarter mile radius of the review area.

#### **4.1.18 Orphan Site Summary**

The Orphan Summary is a list of poorly mapped facilities due to inadequate address information in the neighboring area of the subject site. As part of the site reconnaissance, Eco-Systems conducted a survey of nearby properties searching for Orphan sites listed from the EDR report to determine their significance in relation to subject site distance. Eco-Systems could not readily identify any Orphan sites listed on the EDR report within a one-half mile radius of the subject site.

### **4.2 Additional Environmental Record Sources**

The MDEQ’s UST database was reviewed for the presence of USTs and their proximity to the subject site. The MDEQ database revealed an additional site, not recognized by the EDR Report, with registered USTs located within the required search radius. Greyhound Bus Line located at 207 Front Street and approximately 0.18 miles north of the subject site is listed as a UST site. A copy of the registered USTs in the McComb, MS area is included in **Appendix D**.

### **4.3 Physical Setting Source(s)**

Various physical setting sources were used to further investigate the history of the review area. The sources reviewed and the findings are discussed in the following paragraphs.

The USGS 7.5-minute topographic maps for the area (*McComb, Mississippi*) were reviewed to provide physical setting information at the review area (**Figure 1**). Historical topographic maps of the subject site and review area were obtained from EDR. The available maps were from 1972, 1984 and 1994. The map was reviewed for the presence of structures, equipment, or changes to drainage patterns. Copies of the historic topographic maps from EDR are provided in **Appendix E**.

*1972* – The 1972 topographic map indicated that the subject site was developed and the surrounding areas are similar to current conditions.

*1984* – The 1984 topographic map indicated that the subject site and the surrounding area are developed and similar to current conditions.

*1994* – The 1994 topographic map indicated that the subject site and the surrounding area are developed and similar to current conditions.

The EDR Report indicated that the subject site is underlain with Brookhaven silt loam soils. According to the EDR Report, National Cooperative Soil Survey and Pike County Soil Survey, this soil association is somewhat poorly drained and does not meet the requirements for a hydric soil.

#### **4.4 Historical Use Information on the Property**

##### **4.4.1 Historical Aerial Photographs**

Aerial photographs were obtained from EDR. The available aerial photographs from the EDR were from 1952, 1971, 1982, 1985, 1992, 1996, 2005, 2006, and 2007. The photographs were reviewed for the presence of structures, equipment, or other environmental factors. Copies of the aerial photographs from EDR are provided in **Appendix E**:

*1952* - The review area cannot be accurately identified due to the poor quality of the photo.

*1960* – No aerials from the 1960s were obtained and therefore considered a data gap. This data gap and additional deviations are further discussed in Section 10.0.

*1971* - The review area cannot be accurately identified due to the poor quality of the photo.

*1982* - The review area cannot be accurately identified due to the poor quality of the photo.

*1985* - The review area cannot be accurately identified due to the poor quality of the photo.

*1992* - The review area appears similar to the current conditions with structures present.

*1996* - The subject site and surrounding area appears similar to current conditions.

*2005* - The subject site and surrounding area appears similar to current conditions.

*2006* - The subject site and surrounding areas appear similar to current conditions.

*2007* - The subject site and surrounding areas appear similar to current conditions.

##### **4.4.2 Sanborn Maps**

Based on the EDR Certified Sanborn Map Report, the subject site has been developed since the late 1880's. Sanborn Maps were obtained from 1886, 1893, 1898, 1904, 1907, 1913, 1918, 1925, 1949, and 1961. A summary of the Sanborn Map Report is provided below. The complete Certified Sanborn Map Report from EDR is provided in **Appendix F**.

<b>Map Date</b>	<b>Description</b>
1886	The 1886 map indicates an unidentified structure on the eastern portion of the subject site. Residential structures are located west of the subject site. Two vacant structures are depicted north of the subject site. A Railroad and Railyard are located east of the subject site
1893	The 1893 map indicates a butcher shop on the eastern portion of the subject site. Residential structures, water tank, and restaurant are located north of the subject site. A Brazilian Hotel is located south of the subject site. A Railroad and Railyard are located east of the subject site
1898	The 1898 map indicates the subject site to be developed as a grocery store. The surrounding areas appear to be completely developed. The 1898 map indicates the Railroad Repair and Railyard, including the Railroad Turn-About, are developed and located east of the subject site. A Printing shop is located approximately 170 feet south of the subject site.
1904	The 1904 map indicates the subject site to be developed similarly to the 1898 map. An Oil Warehouse is identified southeast of the subject site and south of the Turn-About. The surrounding properties appear similar to the 1898 map.
1907	The 1907 map indicates the subject site and surrounding properties are similar to the 1904 map.
1913	The 1913 map indicates the subject site is similar to the 1907 map. A Laundry Shop is indicated to be north of the subject site.
1918	The 1918 map indicates the subject site and surrounding properties are similar to the 1913 map. An Auto Display Store is indicated northwest of the subject site and across South Front Street.
1925	The 1925 map indicates the western portion of the subject site appears to be developed as a Tire Vulcanizing facility. An Auto Storage facility was identified approximately 100 feet north of the subject site. A Gas Tank was identified adjacent to the western portion of the subject site across South Front Street. An Auto Repair and Sales facility was identified approximately 100 feet southwest of the subject site across Canal Street. The surrounding properties are similar to the 1918 map.
1949	The 1949 map indicates a Tire Vulcanizing facility and a Filling Station are developed on the subject site. Two Filling Stations, Dry Cleaners, and an Auto Repair facility were identified approximately 300 feet west of the subject site along Canal Street. A Bus Station was identified approximately 100 feet southeast of the subject site along Canal Street. Two Auto Repair facilities were identified approximately 100 feet south of the subject site and across Canal Street.
1961	The 1961 map indicates an Auto Repair facility is located approximately 50 feet west the subject site and surrounding properties are similar to the 1949 map.

#### **4.4.3 City Directory Reports**

The City Directory Report did not provide any historic information or coverage on the subject site. The City Directory Report is included as **Appendix G**.

## **5.0 Review Area Reconnaissance**

---

A walking visual reconnaissance of the review area was performed on June 20, 2013 by Eco-Systems. The review area visit was conducted to observe general conditions of the subject site and evidence of the existence of possible environmental impacts. The visual reconnaissance included an investigation of property features such as stained soil and stressed vegetation that may indicate the presence of contamination from discharges, leaks, or spills of chemicals of potential concern. Adjacent properties were also observed from the subject site boundary to assess the potential for environmental impacts from off-site activities that could affect the review area. Photographs of the review area taken during the review area reconnaissance are provided in **Appendix A**.

### **5.1 Methodology and Limiting Conditions**

Site reconnaissance was conducted on both the interior and exterior of the subject site. Visual reconnaissance of adjacent properties was conducted from the subject site and public access areas.

### **5.2 General Review Area Setting**

The general setting of the review area is comprised of a high-density suburban area in downtown McComb, Mississippi. The review area consists of a multi-parceled property containing two former residential lots and two former commercial lots located north of Canal Street, east of Front Street, and west of Railroad Boulevard in McComb, Pike County Mississippi. The review area contains moderate slopes and characteristic of the surrounding areas. Modes of drainage for the review area generally occur flowing eastward towards Little Tangipahoa River and Town Creek. The City of McComb provides the water and sewer utilities to the site. Entergy provides the electricity to the review area. Centre Point provides the natural gas to the review area. General site characteristics can be seen in the **Figure 2 – Existing Conditions**. Photos of the review area taken during reconnaissance are provided in **Appendix A**.

### **5.3 Exterior Observations**

The subject site was observed with one structure located on the southwest corner of the property (**Photo 1**). The structure is a former commercial building situated on a concrete foundation, constructed with potential ACMs, and observed in poor condition (**Photo 2**). A covered garage area was observed attached to the structure (**Photo 3**). Two former residential lots were observed on the northern portion of the subject site (**Photos 4 & 5**). Furniture, building materials, industrial equipment, and miscellaneous items were observed on the northern portion of the subject site (**Photos 6 & 7**). A concrete slab was observed on the southeastern portion of the site. This area is known to be the historical location of a former filling station (**Photo 8**). Two parcels separated by a horizontal concrete beam were observed on the eastern portion of the subject site (**Photo 9**). Metal piping was observed protruding from the ground on the eastern portion of the

subject site (**Photos 10 & 11**). The subject site is bounded by Canal Street, Railroad Boulevard, Front Street, and a commercial structure.

#### **5.4 Interior Observations**

One structure was observed on the subject site. The structure was observed dilapidated with severely damaged roof (**Photo 12**). The structure was observed containing landscaping materials, automobile parts, lighting equipment, doors, shelves, and electronic equipment (**Photos 13 & 14**). Several items within the building were observed damaged or deteriorating. The structure was observed to be constructed with potential ACMs.

#### **5.5 Adjacent Properties**

The Illinois Gulf Central Railroad and Railcar Museum Exhibit are located east of the subject site (**Photo 15**). A developed commercial property is adjoining the northern portion of the subject site and was observed operating as the McComb Electric Supply Company (**Photos 16 & 17**). An open grass-covered lot was observed south and across Canal Street from the subject site (**Photo 18**). A vacant commercial building and an Auto Supply facility were observed west of the subject site.

## 6.0 Interview(s)

---

**Communication with:** Jimmy Crellin (601-961-5230)  
Project Manager MDEQ

**Location:** Jackson, Mississippi

**Communication by:** Meeting on February 7, 2013

**Regarding:** Review Area History of IGCC Voluntary Cleanup Program

**Summary of Communication:** John Ryan met with Mr. Crellin to discuss the history of assessment and remediation as well as the current conditions of this project. Mr. Crellin is the project manager for MDEQ's Uncontrolled Sites Division. Mr. Crellin relayed the relatively low permeable nature of the near surface soils that pass into permeable sands and gravels of the Citronelle Formation. We reviewed maps of the AECs and nearby groundwater assessed and/or remediation wells. The areas are well understood and existing free product is addressed with Quarterly Mobile Enhanced Extraction Vacuum events.

**Communication with:** Richard Moore (601-684-1160)  
McComb Electric Supply

**Location:** McComb, Mississippi

**Communication by:** Telephone Interview on July 16, 2013

**Regarding:** Review Area History

**Summary of Communication:** Josh Brown contacted Mr. Moore to discuss the history of the subject site. Mr. Moore is the owner of portions of the subject site. Mr. Moore stated that he believed the two northernmost parcels were former residential lots. He stated that the building located on the southwestern portion of the site was a former Tire Warehouse that is currently used for storage purposes. Mr. Moore stated he was aware of the ACMs within the structural components of the building. He stated that a former filling station was historically located on the southeastern portion of the site. Mr. Moore stated that a conversation with a person familiar with the site revealed the potential presence of three (3) 1,000 gallon USTs associated with the former filling station on the southeastern portion of the site. Mr. Moore stated he was unaware of any additional environmental violations regarding the subject site.

## 7.0 Additional Services

Eco-Systems conducted screening level sampling of potential Asbestos Containing Materials (ACMs) and potential Lead-Based Paint (LBP) materials collected from portions of the structure located on the southwestern portion of the subject site. The purpose of the sampling was to identify select suspect ACMs and LBP materials and components, which may be impacted by renovation or demolition activities. Prior to sample collection, Eco-Systems conducted a visual inspection of the property to screen for suspect ACMs and LBP materials. Upon completion of the visual inspection, building materials were grouped into categories and samples were collected from selected suspect ACMs and LBP materials previously identified. Each of the suspect samples collected for this report were given a unique sample identification number and sealed inside leak-proof containers for shipment to EMSL Analytical, Inc. in Baton Rouge, LA for analysis. EMSL laboratory results are included in **Appendix H**.

### **ASBESTOS**

Wall material was collected from the exterior of the structure identified on the subject site. The floor tiles and mastic were analyzed using EPA 600/R-93/116 and/or EPA 600/M4-82-020 Method(s) using Polarized Light Microscopy. The following results were reported:

Sample ID	Appearance	% Fibrous	% Non-Fibrous	%Type
SP-13 Wall Paint/Material	Gray	0	75%	25% Chrysotile

### **LEAD-BASED PAINT**

Painted wall material was collected from the exterior of the structure identified on the subject site. The painted surfaces were analyzed using the Flame AAS (SW 846 3050B\*/7000B). The following results were reported:

Sample ID	
SP-13 Wall Paint/Material	Not analyzed because sample analysis was positive for asbestos.

## **8.0 Opinion**

---

Based on the information obtained during the Phase I ESA process, Eco-Systems identified potential AECs associated with the subject property (**Figure 3**). The subject site was revealed to have a former filling station and tire vulcanizing facility historically located on the southern portion of the property. Additionally, three (3) USTs associated with the former filling station are believed to be currently in the ground. The EDR Report and Sanborn Maps identified several historical auto repair facilities and filling stations located within close proximity of the subject site. Illinois Central Gulf Railroad was identified by the EDR Report as a CERLIS-NFRAP site. One active and permitted UST service facility is located to the south of the subject site. This facility had a reported release.

Based on the information gathered and reviewed during this Phase I ESA, Eco-Systems recommends further investigation of the underlying soils and groundwater to evaluate the potential for soil and groundwater impact from the subject site and off-site properties known to have had previous releases into the environment. Eco-Systems reserves its rights to change its opinion if new or additional information should come to light.

## 9.0 Conclusions

---

The City of McComb commissioned Eco-Systems to conduct a Phase I Environmental Site Assessment (Phase I ESA) in downtown McComb, Mississippi. The review area for this report is one of several areas currently under evaluation and consists of a multi-parceled commercial property located north of Canal Street, east of Front Street, and west of Railroad Boulevard in downtown McComb, Mississippi. This area is specifically identified as the McComb Electric site. This work was part of the Brownfields Assessment Program. The Brownfield's Program is being utilized to evaluate a number of areas within the City of McComb in order to revitalize abandoned or under-utilized areas. The project activities are being conducted as part of the city's ongoing efforts to improve the areas within the business district as part of a Brownfields Assessment Grant funded through and implemented under the direction of the U.S. Environmental Protection Agency (EPA)

Eco-Systems completed the Phase I ESA of the review area in accordance with the scope and limitations of ASTM Standard E1527-05. Through the process of completing the Phase I ESA, Areas of potential Environmental Concern (AECs) and more specifically, Historical Recognized Environmental Conditions (HRECs), were identified. The following findings and recommendations are based upon conditions observed at the time of reconnaissance, a "good faith" reliance on the information gathered from interviews and records, the information available for review within the time frame allowed by this project, and the limitations of the procedures and methodologies utilized:

**AEC-1/Historical-REC-1: Onsite Historic Filling Station.** A review of the 1949 and 1961 Environmental Data Resource (EDR) Sanborn Maps revealed that a former Filling Station and Tire Vulcanizing facility were historically located on the subject site. No additional information regarding closure of the USTs could be obtained from the MDEQ or commercial environmental records reports. Although interviews indicated the former filling station's USTs may still be in the ground and several cut off pipes were observed onsite, Eco-Systems could not verify their presence with other standard lines of evidence.

*Recommendation: Based on the location of the on-site historical automobile filling station and information obtained during the interview process, Eco-Systems recommends a targeted Phase II soil, soil gas, and groundwater investigation be completed on the subject site to evaluate the presence and magnitude of subsurface impact. Although no substantive evidence was revealed to accurately determine if the potential USTs exist on-site, Eco-Systems recommends that any historic USTs on the subject site be identified, evaluated, and removed from the ground using either non-invasive geophysical methods and/or excavation.*

**AEC-2/HREC-2: Offsite Undifferentiated Historic Filling Stations/Auto Repair Shops.** A review of the 1918, 1925, 1949, and 1961 Environmental Data Resource (EDR) Sanborn Maps revealed that numerous historic filling stations and auto repair shops with

several gasoline tanks were located in close proximity to the subject site. Two historic automobile repair facilities were identified 50 feet south and southwest of the subject site. Historic filling stations and automobile repair facilities are known to have commonly released petroleum. These releases are a result of spills and leaks that occur over the years during the handling and storage of petroleum constituents and degreasing solvents. Although, unsubstantiated by other lines of evidence, these sites are of concern due to the close proximity to the subject site location.

*Recommendation: Based on the number and location of several historical automobile filling stations and repair shops, Eco-Systems recommends a targeted Phase II soil, soil gas, and groundwater investigation be completed on the subject site.*

**AEC-3/HREC-3: Offsite Historic Dry Cleaners.** A review of the 1925, 1949, and 1961 EDR Sanborn Maps revealed that at least two (2) historic dry cleaning facilities were located less than 750 feet west of the subject site. Further, a review of the 1918 & 1913 EDR Sanborn Maps revealed that a historic Chinese laundry facility was located approximately 150 feet north of the subject site on North Front Street. Historical dry cleaners are known to have commonly released chlorinated or Stoddard solvents. Although, unsubstantiated by other lines of evidence, these sites are of concern due to the close proximity to the subject site location.

*Recommendation: Although historical dry cleaners are known to have commonly released hazardous solvents, no lines of evidence were found indicating the listed laundry as ever being a dry cleaner or using or releasing any hazardous substances. Eco-Systems does not recommend any further assessment associated with this AEC.*

**AEC-4/HREC-4: Offsite Metal Slag, Railyard & Museum Site.** Eco-Systems reviewed assessment and remediation files at the Mississippi Department of Environmental Quality (MDEQ). The files revealed heavy metals such as Lead and Arsenic were identified in the underlying soils of the nearby properties. An interview with MDEQ's project manager revealed that analysis of groundwater samples extracted from onsite Monitoring Well MW-15 reported elevated levels of Lead. The MDEQ said MW-15 was installed to monitor potential migration of groundwater impacts from offsite sources.

*Recommendation: Based on the distance and hydraulic position from the subject site and nature and extent of the contaminants of concern, Eco-Systems believes this known impact will not adversely impact the review area. Therefore, no additional investigation is warranted or recommended in association with this AEC.*

**AEC-5/HREC-5: Offsite IGCC Railroad & Undifferentiated Areas of Concern.** During the review of the Environmental Data Resources (EDR) Report, Illinois Central Gulf Railroad (ICGR) was identified in the Comprehensive Environmental Response, Compensation, and Liability Information System-No Further Remedial Action Planned CERCLIS-NFRAP database. CERCLIS-NFRAP sites are those that have had previous

site assessments and that the U.S. Environmental Protection Agency (EPA) has determined no further steps will be taken to list the site under the National Priorities List (NPL) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. In addition, ICGR was identified as a SHWS site with soils contaminated with Total Petroleum Hydrocarbons (TPH). The site was observed to be in close proximity to the subject site. The site is active and currently being remediated. Eco-Systems reviewed the site files at the Mississippi Department of Environmental Quality (MDEQ). Significant levels of soil and groundwater impact were identified across multiple areas of concern in the ICGR; these areas include the Locomotive Fueling Area, Railroad Car Repair Area, Former AST/UST locations, and Automotive Shop

*Recommendation: Eco-Systems believes that the MDEQ's close involvement in this potential offsite source of soil and groundwater impact limits the need to complete additional groundwater assessment on the subject site. Therefore, no additional investigation is warranted or recommended in association with this AEC.*

**AEC-6: Offsite Undifferentiated Leaking Underground Storage Tanks (LUST) Sites.** During the review of the EDR Report, numerous LUST sites were identified within the required search radius of the subject site. Of the six LUST sites identified, only one was identified as **active** and reported with soil and groundwater contamination. This site is identified as the DST Foodmart facility, located approximately 2,050 feet south and down-gradient of the subject site. The remaining five LUST sites were indicated by the EDR Report to have received No Further Action letters.

*Recommendation: Considering the distance to the subject site and its hydraulic position, Eco-Systems does not recommend any further action associated with this AEC.*

**AEC-7: Potential Asbestos Containing Materials (ACMs).** During the site reconnaissance, wall material from an on-site structure constructed with ACM was observed in poor overall condition. Focused samples of portions of the wall material revealed 25% potentially-friable Chrysotile. As such and considering the age and condition of the building, Eco-Systems believes the exterior wall material and additional building materials such as any pipe insulation are likely ACMs. The overall condition of the structure was observed dilapidated, including extensive roof damage, and therefore could become potentially-friable if disturbed.

*Recommendation: Eco-Systems recommends an asbestos survey be conducted by a certified asbestos professional prior to any remodeling or demolition activities conducted on the subject site.*

**AEC-8: Potential Lead-Based Paint (LBP).** During the site reconnaissance, Eco-Systems collected a sample of wall material and submitted it to a laboratory for analysis to screen for the presence of lead-based paint (LBP) materials. The sample could not be analyzed because it tested positive for ACM. As such and considering the age and

condition of the building, Eco-Systems believes additional building materials likely contain lead-based paint coverings.

*Recommendation: Eco-Systems recommends a lead-based paint survey be conducted by an EPA-certified professional prior to any remodeling or demolition activities conducted on the subject site.*

It is important to note **that designation as an AEC does not necessarily equate to a REC**. The designation of an AEC provides unified terminology for the discussion of potential on-site or off-site issues during the investigative process.

## **10.0 Deviations**

---

A former filling station was historically located on the subject site and this type of facility is known to handle petroleum products and USTs. Detailed information regarding types of activities, chemicals used, waste product management, and spills is lacking and those records are not available. The most concerning data gap pertains to the unaccounted potential USTs that are believed to exist in the ground on the subject site. The available aerial photographs were from 1952, 1971, 1982, 1985, 1992, 1996, 2005, 2006, and 2007. Data gaps are present for the following time periods: Prior to 1952, 1960's, and late 1970's and early 1980's. The poor quality and resolution of the aerial photographs present additional data gaps. Historical topographic maps were also reviewed including maps from 1972, 1984, and 1994. A city directory was requested; but did not accurately reveal historical ownership details associated with the subject site. Eco-Systems believes that these data gaps, if filled, could potentially yield discovery of additional RECs that may warrant further investigation.

## **11.0 References**

---

Documents referenced during preparation of this Phase I ESA are cited in the report section that contains the referenced information.

## **12.0 Signature(s) of Environmental Professional(s)**

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the review area. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. My qualifications and the qualifications of personnel conducting the review area reconnaissance and interviews are discussed in Section 13.0.

---

Date: August 30, 2013

## **13.0 Qualification(s) of Environmental Professional(s)**

ASTM E 1527-05 requires that the firm conducting the ESA provide information regarding the qualifications of the firm with respect to the performance of the ESA. Eco-Systems is an environmental consulting engineering firm serving the needs of Mississippi and the surrounding states. The firm is staffed by professionals with graduate and undergraduate degrees in engineering, biology, chemistry, geology, environmental sciences and urban planning. These professionals maintain a strong technical proficiency and sound scientific approach to the conduct of ESAs. The performance of this Phase I ESA and preparation of this report were conducted by Mr. Joshua Brown and Mr. John Ryan, CHMM, RPG. Mr. Joshua Brown holds a B.S. degree in Fisheries Science and Aquaculture and is a Professional Scientist with extensive experience in Phase I ESAs and other environmental assessments. Mr. Ryan completed his Bachelor of Arts and Master of Science-level geological studies at the University of Maine-Farmington and University of Arkansas-Fayetteville, respectively. Mr. Ryan is a Registered Professional Geologist in Mississippi and is a Certified Hazardous Materials Manager. Mr. Ryan is also the residing chapter President of the Alliance of Hazardous Materials Professionals of Mississippi. Mr. Ryan has over 19 years of experience in conducting environmental investigations.

**137479**

**WARRANTY DEED**

For and in consideration of the sum of Ten Dollars (\$10.00), cash in hand paid, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, I, the undersigned, **ROSE MARIE VACCARELLA, Trustee for Bennie Vaccarella** do hereby bargain, sell, convey, and warranty unto **RICHARD C. MOORE, JR.**, the following described property situated in McComb, Pike County, Mississippi, to-wit:

*Commence at a painted chisel point marking the NW corner of Lot 2, Square 37, West McComb, City of McComb, Pike County, Mississippi, said point being the point of beginning, run easterly perpendicular to the west boundary of Square 37 a distance of 83.14' to a found iron; thence run southerly parallel to the South Railroad Boulevard a distance of 50.04' to a found iron; thence run westerly perpendicular to the west boundary of Square 37 a distance of 81.7' to a found iron on the west boundary of Square 37; thence run northerly along said west boundary a distance of 50.00' to the point of beginning, said property being situated in part of Lot 2, Square 37, West McComb, City of McComb, Pike County, Mississippi, and containing 0.095 acres, more or less, as per plat of Gus A. Paulk, P. E., P. L. S. dated January 18, 2001, attached.*

This is the same property (now surveyed as above) conveyed by grantor unto J. W. Young as recorded in Book 411, Page 950.

The purpose of this conveyance is to convey grantor's interest as trustee.

WITNESS MY SIGNATURE, this the 6 day of March, 2001.

  
ROSE MARIE VACCARELLA, Trustee  
of Bennie Vaccarella.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EDR MGP..... EDR Proprietary Manufactured Gas Plants

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 11/02/2012 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ILLINOIS CENTRAL GULF RAILROAD	S RAILROAD BLVD	0 - 1/8 (0.000 mi.)	A1	7

## EXECUTIVE SUMMARY

### ***Federal RCRA generators list***

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 6 RCRA-CESQG sites within approximately 0.25 miles of the target property.

### ***State- and tribal - equivalent CERCLIS***

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality's Uncontrolled Site Project Tracking System.

A review of the SHWS list, as provided by EDR, and dated 01/01/2013 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

### ***State and tribal leaking storage tank lists***

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Quality's LUST Status Report.

A review of the LUST list, as provided by EDR, and dated 01/03/2013 has revealed that there are 7 LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***State and tribal voluntary cleanup sites***

VCP: Voluntary Evaluation Program Sites.

A review of the VCP list, as provided by EDR, and dated 01/01/2013 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>ILLINOIS CENTRAL RAILROAD - MC</i>		<i>SE 1/8 - 1/4 (0.188 mi.)</i>	<i>46</i>	<i>71</i>

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Lists of Landfill / Solid Waste Disposal Sites***

SWRCY: A listing of recycling facilities.

A review of the SWRCY list, as provided by EDR, and dated 11/01/2011 has revealed that there are 2 SWRCY sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

MCCOMB RECYCLING CENTER	715 SOUTH BROADWAY	S 1/4 - 1/2 (0.404 mi.)	53	80

#### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/11/2012 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 17 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D004  
Waste name: ARSENIC

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F004

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: CRESOLS AND CRESYLIC ACID, AND NITROBENZENE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

**Hazardous Waste Summary:**

Waste code: D000  
Waste name: Not Defined

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MS-ENSITE (Mississippi - Tools For Environmental Management And Protection Organizations). Mississippi Department of Environmental Quality (MDEQ) Office of Pollution Control's (OPC) maintains enSite. It is the electronic Environmental Site Information System that regulates compliance assurance, permitting, activity tracking, and maintenance of a single agency interest-link to definition master file.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F001  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR

F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

**FINDS:**

Registry ID: 110002204463

**Environmental Interest/Information System**

MS-ENSITE (Mississippi - Tools For Environmental Management And Protection Organizations). Mississippi Department of Environmental Quality (MDEQ) Office of Pollution Control's (OPC) maintains enSite. It is the electronic Environmental Site Information System that that regulates compliance assurance, permitting, activity tracking, and maintenance of a single agency interest-link to definition master file.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/04/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/04/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/04/2013

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/02/2012	Source: EPA
Date Data Arrived at EDR: 11/28/2012	Telephone: 703-412-9810
Date Made Active in Reports: 01/07/2013	Last EDR Contact: 01/04/2013
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/11/2013

	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2012

## ***State- and tribal - equivalent CERCLIS***

### SHWS: CERCLA/Uncontrolled Sites File List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 01/01/2013	Source: Department of Environmental Quality
Date Data Arrived at EDR: 01/04/2013	Telephone: 601-961-5666
Date Made Active in Reports: 01/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 18	Next Scheduled EDR Contact: 04/15/2013

Data Release Frequency: Varies

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/10/2012

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/11/2012  
Date Data Arrived at EDR: 09/12/2012

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2012	Telephone: (404) 562-8651
Date Made Active in Reports: 12/04/2012	Last EDR Contact: 01/03/2013
Number of Days to Update: 61	Next Scheduled EDR Contact: 04/15/2013

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 01/17/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 04/29/2013
	Data Release Frequency: Semi-Annually

## FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2009	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 08/12/2010	Telephone: 202-528-4285
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 12/10/2012
Number of Days to Update: 112	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Varies

## CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 10/01/2012	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 10/19/2012	Telephone: Varies
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 12/28/2012
Number of Days to Update: 62	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Varies

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 02/27/2012	Source: EPA
Date Data Arrived at EDR: 03/14/2012	Telephone: 703-416-0223
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 12/11/2012
Number of Days to Update: 92	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010	Source: Department of Energy
Date Data Arrived at EDR: 10/07/2011	Telephone: 505-845-0011
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 11/28/2012

	Data Release Frequency: Varies

## MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 08/18/2011	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 09/08/2011	Telephone: 303-231-5959
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 12/05/2012
Number of Days to Update: 21	Next Scheduled EDR Contact: 03/18/2013
	Data Release Frequency: Semi-Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 09/01/2011	Telephone: 202-566-0250
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 11/28/2012
Number of Days to Update: 131	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Annually

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2006	Source: EPA
Date Data Arrived at EDR: 09/29/2010	Telephone: 202-260-5521
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 12/28/2012
Number of Days to Update: 64	Next Scheduled EDR Contact: 04/08/2013
	Data Release Frequency: Every 4 Years

## FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 11/26/2012
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 11/26/2012
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/23/2011	Source: EPA
Date Data Arrived at EDR: 12/13/2011	Telephone: (404) 562-9900
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 12/11/2012
Number of Days to Update: 79	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 05/08/2012	Source: Environmental Protection Agency

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 01/18/2012

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 11/11/2011

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 07/31/2012

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 11/01/2012  
Date Data Arrived at EDR: 11/07/2012  
Date Made Active in Reports: 12/11/2012  
Number of Days to Update: 34

Source: Department of Environmental Conservation

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## Daycare Centers: Child Care Listing

Source: Department of Health

Telephone: 601-576-7613

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

MCCOMB, MS 39648

### TARGET PROPERTY COORDINATES

Latitude (North):	31.2449 - 31° 14' 41.64"
Longitude (West):	90.4533 - 90° 27' 11.88"
Universal Tranverse Mercator:	Zone 15
UTM X (Meters):	742542.1
UTM Y (Meters):	3459355.8
Elevation:	414 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	31090-B4 MCCOMB SOUTH, MS
Most Recent Revision:	1972
North Map:	31090-C4 MCCOMB NORTH, MS
Most Recent Revision:	1972

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Target Property County</u> PIKE, MS	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	28113C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u> NOT AVAILABLE	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: RUSTON

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Not reported	Not reported	Max: 42.34 Min: 14.11	Max: 5.5 Min: 4.5
2	11 inches	38 inches		Not reported	Not reported	Max: 42.34 Min: 14.11	Max: 5.5 Min: 4.5
3	38 inches	79 inches		Not reported	Not reported	Max: 42.34 Min: 14.11	Max: 5.5 Min: 4.5

#### Soil Map ID: 2

Soil Component Name: BROOKHAVEN

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 6 Min: 4.5

4	57 inches	62 inches		Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 6 Min: 4.5

### Soil Map ID: 3

Soil Component Name: ORA

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	7 inches	25 inches		Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.6
3	25 inches	55 inches		Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.6
4	55 inches	70 inches		Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.6

### Soil Map ID: 4

Soil Component Name: FALAYA

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	50 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 0.42	Max: 5.5 Min: 4.5
2	50 inches	64 inches		Not reported	Not reported	Max: 14.11 Min: 0.42	Max: 5.5 Min: 4.5

### Soil Map ID: 5

Soil Component Name: COLLINS

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 4.5
2	7 inches	48 inches		Not reported	Not reported	Max: 14.11 Min: 4.23	Max: 5.5 Min: 4.5

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Health Department Wells

Source: Mississippi Automated Resource Information System Technical Center

Telephone: 601-432-6149

Public supply water wells monitored by the Environmental Division of the Department of Health.

#### Permitted Wells

Source: Mississippi Automated Resource Information System Technical Center

Telephone: 601-432-6149

Water wells, 6-inches in diameter or larger that are permitted and monitored by the Office of Land and Water Resources.

#### USGS Private Wells

Source: Mississippi Automated Resource Information System Technical Center

Telephone: 601-432-6149

Privately owned water wells monitored by the USGS.

#### USGS Public Wells

Source: Mississippi Automated Resource Information System Technical Center

Telephone: 601-432-6149

Publicly owned water wells monitored by the USGS.

## OTHER STATE DATABASE INFORMATION

### Oil and Gas Well Location Listing

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	<u>Target Street</u>	<u>Cross Street</u>	<u>Source</u>

EMSL maintains liability limited to cost of analysis. This report relates only to the samples reported and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Samples received in good condition unless otherwise noted. Estimated accuracy, precision and uncertainty data available upon request. Reporting limit is 1%

EMSL maintains liability limited to cost of analysis. This report relates only to the samples reported and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Samples received in good condition unless otherwise noted. Estimated accuracy, precision and uncertainty data available upon request. Reporting limit is 1%

Reporting limit is 0.010 % wt based on the minimum sample weight per our SOP. The QC data associated with these results included in this report meet the method QC requirements, unless specifically indicated otherwise. Unless noted, results in this report are not blank corrected. EMSL bears no responsibility for sample collection activities. Samples received in good condition unless otherwise noted. \* slight modifications to methods applied. "<" (less than) result signifies that the analyte was not detected at or above the reporting limit. Measurement of uncertainty is available upon request. Samples analyzed by EMSL Analytical, Inc. Baton Rouge, LA LELAP 01950, A2LA Accredited Environmental Testing Cert #2845.03
